Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 10-21, 39-41, drawn to user requested video, classified in class 725, subclass 95.
 - II. Claims 7-9, 36-38, drawn to defining a region of interest using substreams, classified in class 382, subclass 282.
 - III. Claims 22-29, drawn to a video distribution network, classified in class 725, subclass 109.
 - IV. Claims 1-6, 30-35, drawn to a specific decoder utilizing spatial location, classified in class 375, subclass 240.25

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II-IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the user requested video can use a variety of decoders, substreams, and distribution networks in order to obtain/display the video desired. The subcombination has separate utility such as a decoder for decoding video not in the user requested video environment, a substream creation scheme for creating substreams not related to the user requested video environment,

and a video distribution network for distributing video not in the user requested video environment .

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. DeVos on January 29, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dave Czekaj whose telephone number is (703) 305-3418. The examiner can normally be reached on Monday - Friday 9 hours.
